The Book of Power

The Bible not only has power to awaken Consciousness; it likewise has power to vitalize. It requires life to communicate life. I make bold to say it is always where the Bible has been given the largest "right of way" they renew enterprise & energy.

So it is throughout christendom those churches which are most formal & lifeless, & which, apparently, lack propagating powers, are those which are most ignorant of these writings. Here is vitality: "Thou hast the words of

What sinful men up & down the world's Church is not more teaching as to what they aught to do & be, in higher ideals, & in nobler examples but rather which energises the will to do its duty. For some reason which never fails to move men with one, God has pleased in all these years to Communicate mostly His impulse & irresistable energy through these Vital pages that we scatter, at times, I think, so carelessly among the nations.

The Bible has energising powers as well. Huxley said that, the only true education is that which enables a man to do what he knows he ought to do, at the time he ought to do it, regardless of the consequences. I want to emphasise that the Bible, as no other writing, Communicates powers, making man to take that difficult step, which you & I are called on to take many times each day — the step between knowing our duty & doing it. It is at this point that the other religions so hopelessly

RANKINE DAWSON, M.A., M.D., C.M. (McGill University); F.R.C.I.; M.R.C.S.E., L.R.C.P., Lond.

After taking his degree in 1882, Dr. DAWSON was engaged in professional work in Western Canada for two years, during a part of which time he was in medical charge of the men employed in constructing the Canadian Pacific R. R. in Manitoba. He then went to London, where a year or two was devoted to hospital work, and the qualifications, as above, acquired and registered. Subsequently four years were spent as surgeon in the P. & O. Company's service. After giving up this position, further time was given to hospital work in London, more especially in hospitals for the treatment of diseases of children and of the skin.

During the ten years referred to above, Dr. DAWSON has travelled extensively in America, has visited India, China and the Australian colonies, and has enjoyed exceptional opportunities of studying the diseases peculiar to these countries, as well as of familiarizing himself with medical practice and hospital management in them.

induced to leave their home, and there is always a drippy of pauper emigrants for large towns but the pith and marrow of the colonies everywhere are Scotsmen & Irishmen & the descendants and it is in these parts of the British Islands that the ~~not~~ old imperial colonizing spirit still remains. In some lowly Scotsmen & Scotch ladies I find more of this energy & spirit and more of the imperial spirit which gave Britain her pre in the world than in any other persons I met with. This difference is stamped on the very appearance of the land as seen by a traveller — In Soft and lovely England one sees another fields and woods emerging with a pure subordinating to the surface of the country and to beauty as well as use and every pure hour & village is nestled in a lazy warm spot. Love of home comfort is stamped on the face of the land and no one who sees it can believe that this is the abode of an energetic & colonizing people. Cross into Scotland and all this is changed — Aquilla opens a map in Sequoia aspect. Fields & farms are marked off geometrically with a bold independence of the of taste & the inequalities of the land. By further

is unquestionably a great one to the Empire both in its home and colonial relations and could the larger colonies be brought into full partnership and their influence into the opposite scale an immense impetus would be given to the creation of such peace & emulation in the world and new life communicated to the social and industrial progress of England itself.

London fully London more especially is accessible of the most intense Cockneyism in the sense of selfishness & isolation from the rest of the empire. There are in long nodes isolated pennies who have little sympathy or close connection with almost all parts of the world but I speak of the precarity time given a colonial or a foreign man kindly received in London is so very very a personal grounds or in connection with some London interest about he can be made to leave even in Britain it is now a very little field that London is seeing a part of England and that its press is not a Britain press in the full sense of the term. Federation

Whereto does this tend. It is difficult to say but this seems certain that the continued dominance of England and more especially of London is an family to continuance of the British empire as an empire. I do not say of colonial [illegible] but London presents the same aggregation of popular wealth pauperism, [illegible] & Selfshock who Rome did in the later days of the Empire and similar results may follow as they say when the case of the U States of New York which is a miniature Land could rise to the same relative dominance. The Colonies cannot amend the

Englishmen for example have
any just appreciation of the immense
