

Wednesday Evening.
en route. Thetford - Quebec
May 7th 1913.

My dearest Lois

Things have gone according to schedule today and have done pretty well. Got 2 drills from Bell Asbestos Company and one from Martin Bennett. This makes 4 in three days so that I am in hopes of getting one more and making the average one drill per day for the whole trip. I'll sleep in Levis tonight and take an early ferry in the morning. I was about at 7 o'clock this morning.

This evening I saw some of the Gill students playing ball on the street and as I recognized a Jeto went over and

ZETE.

2
spoke to him. So I found two
more and went in to dinner
with them on their private car.
They have a Pullman, a diner
and a baggage car which is
pretty luxurious I think.

Mr Bell of McGill was in charge.

The weather is nice and my
drive from Black Lake to Thetford
was quite pleasant.

Like a fool it has just struck
me that I did not ask for my
mail in Thetford. I hope you
haven't written, because I can't
get anything now till I get home
which is very foolish. As a
matter of fact I was only in the
hotel for 10 minutes at lunch time.

I am awfully sorry. I'm
afraid you'll think I don't
want your letter and I do.
However it can't be helped now.

3.

I wish I knew what you
are doing and how you are
getting on.

I have been thinking as I
mentioned to Dad that we have
been very fortunate in choosing
our parents! The more I think
of the Point Clare scheme the
happier I feel about it. Besides
if you feel like it you will
still be able to go down to
matis for a little while too
I can't spare you for long.

You will be glad to know
that between sentences, and
when the train becomes too
jerky I am reading "Mangy Lango"

This wretched old train is being

held up all along the line. We
 are supposed to get into Quebec
 about 9:00 but it is a quarter to
 nine now and we'll be over
 an hour more.

Well Beauty I have got
 nothing to say except "Good-
 night."

With all love & best wishes
 to my darling wife.

Yours
Edward S. S.
