

Cambridge, Mass.
November 1864

Dear Sir,

By Prof. Agassiz
direction, I send you by this
mail a small package
containing such of the
small corals dredged by
me as are in sufficient
number to allow of their
being disposed of. I have
added also specimens of
the *Ferrobotula cubensis* &
Walckenia floridana, n. sp.

I have a few more
specimens of corals, obtained
this year, which I have
not yet finished describing;

I shall be glad to send
you some of them as soon
as I have done with them.

Very respectfully
yours

L. J. Fourstaté
