

Montreal. Decr. 15. 1868.

My Dear Sir.

in reply to your note of Decr. 13-
I beg leave to say that I think your plan of
adding some lectures on Mineral Fuel to the
little course on Metallurgy will be an excellent
plan & add much to their attractiveness. I
would then give one lecture on the combus-
tion of fuel, treating of the theory of combustion
in relation to furnaces, gas and steam - an
explanation which becomes very necessary as
an accompaniment to lectures on Metallurgy.

I shall now only remain to fix the time for
these lectures during the next term. It should not
like to say precisely at what period I should
attempt to give them, as I must probably
absent myself for some little time in Jan'y
or in Feb'y -

Very sincerely yours

Principal Dawson. J. Terry Hunt.
