McGILL UNIVERSITY ARCHIVES
ACC. NO. 2211 / 63
REF. 77

From Samuel H. Scudder, Cambridge, Mass. 19.11.78

The box came & the contents were cursorily examined before your postal arrived. They came safely. There are some specimens which look to me like another gally-worm at first glance but it seems doubtful if I can make much out of them, and these appear to be the best. Some seem to be fragments of scorpions or of crustacea, but ^{are} such fragmentary remains that it is doubtful if this point can be determined. I am greatly obliged to you for sending them and will do my best in studying them. It has been cloudy weather since they came
