

North River, Jan. 13th 80.

Dear Sir,

I send you the accompanying list of Land Shells found in Prince Edward Island, in addition to the *Mollusca* contained in your list published in the "Report on the Geology of Prince Edward Island". If you think it worth communicating to the "Society of Natural History", you will honour me by your kindness in doing so.

Yours Truly,

Francis Mann.

are all something smaller than
the same occurring in the New
England States, but those with
very fragile shells, as *Helix chersonis*
and *Vitrea limpida* are fully equal
in size.

~~Helix Asi.~~

~~North America.~~

~~P. C. Islands.~~

[The species named in the
Report above referred to and
~~to be added to the list are:~~
are:—

H *Hyalina chersonis*, Say

H — *H. ^{foetida} arborea*, Say
Helix ^{foetida} hortensis, Müll.
(Yellow variety)

of these the two first are
synonyms of species in *Mus. Binn's*
list.]
