

Wittfield
AMERICAN MUSEUM OF NATURAL HISTORY,

CENTRAL PARK, (77th St. & 8th Ave.)

NEW YORK,

July 25th

1881.

Principal J. W. Dawson

Dear Sir

The box containing
P. Pliocene fossils and Graptolites
Plants &c came duly to hand.

I have just had it opened and
examined the contents. I find
them very fine indeed, and must
beg of you to accept the thanks
of the Trustees of the Museum - as
mine as well for the very
interesting donation. The
graptolites are especially fine
and distinct. In fact
so much better than

anything I have seen
before that had I had such
material to make the drawing
from for Dec. 2, Can. Og.
Rev. I should have had
much better eye sight now
than I have -

Again thanking you
for the kindness I am

Yours very truly

P. P. Whitford
