

10, Holles Street,
Cavendish Square. W.

Aug 16/86

Dear Prof Zittel,

Dear Zittel
but make myself
apparently clear ^{wherever} at
the Geol. Society. I
should have said
that my comparison
and) with the debris
of Laurentian rocks
not of crystalline rocks

10. Wall Street.
Cathedral Square, N.Y.

(2)

in general, and with
such debris not
intrequently acted on
by atmospheric waters.
These are the special
characters of the Nile
Mud, and similar
cases are not frequent.
The only ones I have
yet studied (and

these (some of the
preparations made for
another purpose by
S. J. M. Dawson) are
the Minnesota boulder
clays and the
mud of the Red
River, though no
doubt they can
be found.

With this

Wm. B. B. B.

Cometator I thank you
will understand my
view with regard
to the rule depicted

Yours
