GEOLOGICAL & NATURAL HISTORY SURVEY,
Alfred R. C. Selwyn, C.M.G., L.L.D., F.R.S., Director.
MUSEUM AND OFFICE, SUSSEX ST., OTTAWA.

31st Jan^y 1889

My dear Sir William

I have just rec^d your note
of 30th. In reply I may say that
I had already had packed &
was this afternoon intending to
dispatch to J. Carpenter the Indian
specimen wh^{ch} he asks for, also
^{or from same locality.}
~~two~~ ^{seven} slices of same - I am not certain
that we have any of the slices
that show the infiltration of the
minerals than serpentine; colonite,
Soganite &c. which he asks - He
seems

however to attach most importance
to the Tudor specimen — the one
figured in the I. J. G. S. 1867. in

Yours Sincerely

Wm R. Schuchert

Sir D^r Dawson C. M. G.

de —
Montreal.

1889

My dear Mr. Williams

*I have just the four sets
of 250 the only thing very fine
I have already had for sale
for the afternoon. I have
written to Mr. Cooper the
specimen to be sold for
the price of \$100.00 - I am
not sure that he has any of the
sets that are the most valuable
I have seen. I have seen
several that are very fine
I have seen the most
valuable.*
