

THE BRUNSWICK,
BARNES & DUNKLEE,
BOSTON.

P. O. ADDRESS, "BACK BAY, BOSTON."

Friday Oct 3rd

Dear Lady Lawson

I feel I ought to send you
one line to say how we have fared so far.
We had a lovely day to pass through the
White Mountains, but we found they
had misinformed us at Montreal & that we
could not get on from Portland to Boston
that night; so we had to make the best of it &
on Wednesday I went on to Waterbury to see
Prof Rogers & was very glad indeed that I
did so, as I learnt a great deal; I went
back to Portland that night while Prof Cox had
gone on to Boston: I followed him on Thursday
& reached Boston midday: we went over
in the afternoon to see Prof ^{Cross} Knowlidge - Prof
of Physics at the "Tech" as they call it, & he
showed us all over his Laboratory. This
morning we took an electric car out to

Harvard & went over the Physical Lab. with
Prof Ironbridge. I was much interested
in the University & all I saw, especially as
it was founded by men from my own
University so many years ago. This after-
noon I left Prof Cox at Harvard & called on
Prof Lanza at the Mech Lab of the "Tech" &
staid there the whole afternoon. We
have been trying to plan out our time &
find we cannot get back before the
22nd inst, I hoped to be back earlier, but
we cannot get in half what we want
to see even then: However I want to see
well what I do see & not try & rush
round to a great number of different places:
only I am sorry we shall have to cut
out the Museums! I hope your son has
come back safely from the West & is looking
better than you feared!

With our kind regards

believe me

Yours sincerely

Chas. A. Harwood

Any letters forwarded to Murray Hill West
N. York up to the 13th will find us.
