Washington, D. C., Nov. 28, 1853.

Sir William Dawson,  
Montreal Canada.

Dear Sir:

From the Proceedings of the Geological Society of America I learn of the good and most interesting words you have to say in relation to fossil plants. I earnestly hope that nothing may interfere with your presentation of a full discussion of the evidence of these remains in relation to climate, at the next meeting.

By mail I send you what was really my maiden paper on fossil plants - Bull. # 48. Though the customary delay in the Government printing makes it old before it is published. No other apology will be necessary, so far as some things are concerned.

Yours, with respect.

David White
