

Village Richelieu
2^d February

Dear Dr Dawson -

I received the Report
and send it today to Mr
Baynes - I have nothing to
suggest in the way of change
or addition as it appears to
me to cover all the topics
upon which information
can be required and to set
forth well and freely the
position of the University -

It

It seems to me that as
the instrument is entirely
your work it ought to be
signed by you and not
by me. I have however
in order to avoid delay signed
the last sheet as requested
by Mr Baynes leaving to you
to substitute in the other
sheets whatever you may
deem necessary.

I was much disappointed in
being unable to go to the
meetings last week. It is
evident that I ought not to
hold any office in the University
any longer. I have therefore
my

My resignation prepared
and ^{at last} to the governors to be
sent in at their next meeting
I hope to be able to go to
Town before that time and
will then explain more
fully to you my reasons -

We are all pretty well
here and join in kindest
regards to Mrs Dawson
and your circle -

Yours sincerely

W D Bay

Yours truly
M. J. M.

Montreal, Feb 15th 1852

Principal Dawson

Dear Sir

We are doing our utmost
to push the heating of the
Museum and have been
promised that heat will be
on next Monday.

The plastering now done will
not take any injury from
frost even though the windows
were all opened up.

We have not yet decided on
tents for the ceiling; now will
be so so until the plaster is
quite dry and will then con-
-sult you.

We are not aware of any
deviation from our plan in
the placing of the gas lights
in the lecture room. If
they are not right they must

to rectified immediatly, it
is now a difficult matter to
make a change. you will
oblige by letting us know
as soon as possible when
you want the light.

Yours truly
Hutchinson Steele

Beaverville, California.

Dec. 27. 82

Dear Sir:

As I have not seen anything
of the McQueen "Gazette" I conclude
that it has been discontinued. Will
you therefore kindly transfer that
money order I sent you last summer,
to Kenneth Campbell, St James St.?

Yours truly,

E. A. Cushing

The Manor House

Chislehurst, March 10. 1882

My dear Dr Dawson,

I am indebted to you for a very interesting letter dated Feb 22, and I think for one or two previous ones hitherto unacknowledged. You give me the only information I have had for some time of the progress of the Museum which I have tried in some measure to follow by observing the kind of work attached to the amounts which Watson reports to me as having been paid. Roberts must still have a great deal of work to do, but the results of ^{the} labour

labour of forty men should be very perceptible from week to week - I felt very confident that he would do good work and I hope that I shall not be disappointed.

I shall be glad to learn that the difficulty experienced when the heating apparatus was tried was soon overcome.

It is satisfactory to know that it was found not difficult to heat the building while the plasterers were working.

If the tinting of the ceiling should prove unsatisfactory we must have it whitewashed next time, but I have hope that a little colour will not, ~~at least~~, take from the effect of what appears to be otherwise very good. I earnestly hope that it will turn out that no

service
build
for us
same
it st
into
Dist
You
you
Am
sider
meet
prop
ev
Will
the
takes
can

very serious mistake has been made in the
Kelt building and that it will be as well adapted
do for its object as any other building of the
Hall same size. The whole of the building as
it stands could go quite comfortably
left - into the Entrance Hall of the new National
rappla - History Museum at S. Kensington.

ie. You have many good names on
found your Committees for the meeting of the
while American Association - Will any con-
siderable number of them work? The
hone meeting is of such importance that I
it hope the zeal now existing will not
hope evaporate when work is to be done.
at, Will not many of them be away at
years to the Coast or elsewhere when the meeting
takes place? I do not see that I
possibly can be of any use whatever and therefore
two it

it is unnecessary to put my name on
any of the Committees.

What would you wish me to do if I go
out? What part can I take? Of course
I should like some day to see the Babylon
or Museum that I have built, but I have
no desire to draw the attention of anyone
else to it, or the attention of anyone to
myself. The time is a little incon-
venient. People will not have returned
from their summer outs - and Montreal
from June till October is not a hos-
pitable city - Do you expect the Governor
General?

My wife married of oak and workmen
has gone to Afracombe in North Devon and
will likely remain there six weeks more. I may
join her for part of the time. We have had no
cold weather this winter - and not a great deal of frost. I
have only had on my heavy coat once and that only as a
precaution during a journey to and from Liverpool.
My very kindest regards to Mrs. Dawson and all the family
as well as yourself.
Yours very truly
Peter Redpath

Principal Dawson - Montreal

GOVERNMENT HOUSE,

OTTAWA.

10th March 1882.

Sir
I am desir'd by The
Governor General to say in
reply to your letter of 8th
instant, that he much
regrets it will be quite out
of his power to be
present in Montreal in
August next, so that he
will be prevented from
opening the Redpath
Museum as requested in
your communication to
Lieut. Colonel de Winton

of 8th March.

I have the honour to be
Sir

Your most obedient
humble servant

Univ. Coll: Toronto

17 March 82

Dear Dr. Dawson,

I hear that your professor of German is about to resign - The pastor here whom I know very well has called on me to ask if I can ascertain for him if the place is really vacant and if so what the salary is -

Herr von Pirch is excellently suited for such a position - he has a scholarly knowledge of both German and English, and speaks German with most unexceptionable purity. The Berlin noble families are especially proud of their pure pronunciation - Herr v. Pirch has also a natural gift

of eloquence, which is here very rare,
so that Mrs Wright & I often go
to his Church rather than any other.
He has recently been appointed to
a more lucrative position than he
has here - at Berlin, Waterloo Co.
but being a University man him-
self would prefer being engaged
in teaching in a University,
if the appointment were suitable.

He has acted on several
occasions as University Examiner
here and has given the greatest
satisfaction.

I shall be glad if you
will let me know particulars
with regard to the position

Yours faithfully

R Ramsay Wright

Montreal Grad Day

30 March 1882

Dear Sir

I am directed by
the Graduate Society of
McGill University to
invite you on the occa-
sion of their Annual Dinner
to repair to one of the
tables to be prepared.

The dinner will be
held in the Windsor Hotel
on the evening of the
convocation of the
faculties of Arts and
of Applied Science,

Tuesday the 2^d May 1861.

If you will kindly
concur the Committee
will communicate with
you on the subject.

Hoping to receive
a favourable reply

I am

Dear Sir

In reply to your enquiry for slate
"black-boards" we can make them at the following
price - f.o.b. cars at Richmond -

Finished on one side 30^c p. superficial foot

Finished on both sides 35^c - - -

We would have to make them in two pieces -
but joints would be made so perfect that they would
hardly be noticed - Half an inch will be
plenty thick enough for them - if thicker they would
be heavy to handle -

Hoping to receive your order which should
have our best attention

Dear Sir

The Museum jars ordered have arrived and will be delivered today. Of the larger kind only five were sent. As the glass factories ^{close} during July & August, goods required before Autumn should be ordered before the close of this month. We have some samples of wide mouth bottles ranging from 4 oz to 8 oz which we would be glad to show you.

My dear Dr. Dawson,

I suppose I must
make my arrangements with
the view of exhibiting myself
at Montreal in August and I
will aim at being there at least
a week before the 23rd which
I think is the day on which the
American Association proposes
to meet.

J

I appreciate the compliment
which some friends ~~would wish~~ cost
to pay me in procuring a portrait who
for the Museum, but portraits cost
that are not commonplace are sho
costly and I do not like the thin
idea either of unduly taxing the be
willing or of aid being asked hur
from those who would help only alto
because they would not like to the
refuse. I should object of the
to any of my own relatives new
being asked to contribute. I s
from

With the feeling therefore that
a suitable portrait would of the
they

Cost

cost much more than the friends
who suggested the idea were likely to
contemplate, and that contributions
should be wholly spontaneous I
think it doubtful if the object will
be attained and I shall not feel
hurt if the matter be dropped
altogether - That indeed would be
the proper result if any portion
of the means were grudgingly fur-
nished.

I suppose the builder would erect the
front steps as soon as the frost ^{was} out
of the ground - So far as I know
the progress of the building has
been

been satisfactory from the beginning.
I trust that it will be found
that no serious error has been
made either in design or execution.

I have written to Hutchinson & Co for
tracings of parts of the doors and for the
dimensions. I think I will get the Lock
Plates here.

My wife returned from Devonshire last
week, I am sorry to say not much stronger
than when she went away. She will have
plenty to do here for some time to come.
I wish she were fitter for the work.

She cordially joins me in kind love
to you all.

Yours very truly

Peter Redpath

Principal Dawson
Glasgow.

THE PETER REDPATH MUSEUM.

FORMAL OPENING OF THE BUILDING.

A brilliant assemblage—Addresses by Mr. Redpath, Chancellor Day, Dr. Carpenter and others.

The Peter Redpath Museum occupies a commanding position in the Architectural Theatre formed by the group of buildings belonging to the McGill University. The structure presents an imposing appearance from every avenue of approach, and is particularly noticeable for its simplicity of outline and marked constructive strength. Upon the entrance has been expended the principal effort at decoration. The hall is of modest proportions, being enriched with columns, plasters and pannelled work in hard wood. The winter portico is richly decorated with carvings in Greek design, the natural color of the wood being very rich in tone. Facing the entrance is the amphitheatre, and on either side of the vestibule are spacious class rooms. On the right of an entrance is the staircase of ample proportions with massive balustrades leading to the Museum and the gallery above. The hall which constitutes the Museum is 116 feet long by 60 wide and 36 high. Everything has been done to obtain as much light as the climate of this latitude would permit, and the coloring of the ceiling has been considered in relation to this end. It was the special desire of the donor that the building should be of a substantial and durable nature in order to bear any burden in the style of maintenance. His expressed wish has been faithfully carried out, and it is safe to say that there is no building in the city which combines with so much effect, solidity and beauty.

The object of this building is to provide greater facilities for the study of Natural Science, and to furnish the University with a permanent receptacle for its valuable aggregation of specimens. This present is a very timely addition to the resources of the University, and must prove an effective means of facilitating the study of one of the most important branches of higher education. The building, which has, in its construction cost \$100,000, will remain a lasting monument to the munificent liberality of Mr. Peter Redpath.

The formal opening of the Museum last night was an event which will always occupy a prominent place in the annals of McGill University. The imposing structure was thronged upon this occasion by the principal scientific lights of the nineteenth century and their wives and daughters, and with them were mingled the elite of Canadian society. The guests, as they arrived were received in the museum by Principal and Mrs. Dawson, after which they proceeded to inspect the natural treasures in view. The Museum was so crowded that locomotion was an exceedingly difficult performance, and one rendered additionally hazardous by the long trains of the ladies in full evening dress. In the gallery running round the museum a large number of visitors congregated, and became silent spectators of the brilliant scene below them. Shortly after nine o'clock the ceremony of presenting the deed of gift took place. A raised dais had been placed at the eastern end of the museum for the occasion, and around it the guests clustered in a crowd so large that those on the confines were unable to hear anything of the proceedings. There were upon this platform Chancellor Day, Principal Dawson, Mr. Peter Redpath, Mr. W. C. Baynes, registrar, and Mr. R. A. Ramsay, treasurer of the University.

The CHAIRMAN briefly introduced to the assemblage the magnificent benefactor of the college.

Mr. REDPATH said:—Mr. Chancellor—I would fain have had ceremony dispensed with on this occasion, but as some ceremony seems to be demanded I am here by invitation for the purpose of transferring to you as the representative of McGill University, in the presence of this distinguished company, all my right, title and interest in the building in which we are assembled. The conveyance without other condition than that the building shall be maintained for the purpose for which it has been erected, will be found in the document which I now place in your hands. The undertaking was not begun without deliberation, and now that we have come to the end under such happy auspices, I see no reason to regret what has been done. I trust that the benefits which it was intended to confer will be realized.

Chancellor DAY then said: Mr. Redpath, It is my good fortune as Chancellor of McGill University to be its mouth-piece on this auspicious occasion. In the name and on behalf of that institution, I accept the gift of the Peter Redpath Museum now formally conveyed to it. It is a difficult task to express in fitting words our sense of the obligation under which you have laid, not only this University, but also the friends of education, in the interesting and important department of science which your liberality is intended to promote. The architectural beauty of this edifice in which we are assembled—its classic design—the elegance and completeness of its finish, make it of itself an education of no small value; while joined to these excellencies its ample proportions and perfect adaptation to its destined uses indicate the munificence and wisdom of its founder. We trust it will remain for future generations what it now is, a majestic monument, bearing the honored name of him in whom the power of riches has been added to the better gift of a disposition to distribute them with a bountiful hand for the welfare of mankind. You will be gratified to learn that the valuable assemblage of objects of natural science for which you have provided this stately depository has been enriched by the addition of the life-long collections of our learned and honored Principal, Dr. Dawson—a gift by him to the University of great pecuniary and far greater scientific value, and let me add that it is but one of a long series of benefactions and self-sacrifices by which he has earned our gratitude, and acts like these extend further than their first manifest object. They give an impulse to philanthropic hearts, while they furnish a standing protest against the selfish and ignoble use of wealth. The prodigious growth of material prosperity in this our age, the marvellous creations of art and industry which cover the face of the civilized world, and the consequent increase in dangerous luxury, have in them a voice of warning. History tells us what they mean if left for themselves, without the restraining and elevating agencies which build upon them a true and permanent civilization. We accept this hall of science as a noble contribution to those higher agencies, and now before this assembly, made august by the presence of our distinguished guests, true kings of the realm of thought; their presence, and in the presence of the benefactors of this University, enlightened men, and not less, sympathetic and generous women. We dedicate the Peter Redpath Museum to the study of the varied and wonderful manifestations of God's creation, and emphatically we dedicate it to the use of the earnest student, who in reverent questioning of the works of living nature, and in their records upon the stony tablets of a dead and buried world, seeks that vital truth, which, above all other things, it imports the immortal spirit of man to know.

Dr. CARPENTER was then briefly introduced by the Chairman. He said when he received

from his old and valued friend Dr. Dawson an invitation to take part in this meeting he felt that he could not refuse because he wished to give expression to the very strong and earnest interest he felt in this city. Nothing had been of greater interest to him since he had been in the city than to be accosted on all sides as the brother of Phillip Carpenter. Every citizen of Montreal seemed to have known and honored and have loved him. Dr. Doddringe's little girl once said, "Papa, I do not know why everybody loves me so unless it is because I love everybody." It was known that Phillip Carpenter loved everybody and everybody in return loved him. (Applause.) All honor to the great and good man who had given this noble building for the reception not only of the collections of the University, but to afford an illustration of the great principles of natural science. Having alluded to the value of collection of remarkable fossils, as he believed them to be, termed the *eozone canadese*, discovered by Principal Dawson and Sir William Logan, he spoke of the numerous opportunities afforded to students to acquire scientific knowledge as compared with the opportunities which existed when he was a young man. He rejoiced at the thought that natural science was now fairly on its legs and he was confident that it would keep pace with all the great departments of physical science, and concluded with a eulogy upon science as a means of disciplining the mind.

Professor HALL directed attention particularly to the arrangement of the Museum. The collections, he said, had been placed in an order which enabled them to study created objects from the earliest to the most recent geological period. All that was required now was a staff of teachers which would render available all these valuable objects, instead of permitting them to lie idly upon their shelves. The building was in itself a beautiful object of art, adapted for the work in its systematic arrangement. He concluded by reading an extract from Herbert Spencer upon the value of scientific learning.

Dr. DAWSON acknowledged, on behalf of the American Association for the Advancement of Science, the great benefits that had resulted to science from this benefactor.

After the opening the Rev. H. C. Hovey gave an exhibition of photographs taken by artificial light of American caverns. The exhibition was accompanied by an admirable explanatory lecture. The entertainment as a whole was very much enjoyed, and it is to be hoped that that Mr. Hovey may be induced to renew the exhibition in the Queen's Hall.

Walter R. Chace

26th April 1882

Dear Dr Dawson -

I recd your letter
of the 17th and will if
weather and health
permit be with you
Saturday morning & must
however return in the
evening of that day - As to
the Convocation I am bound
by solemn pledge to go to
the Wolsons if I go in -
I could only get pardoned
for

for not going there the time
we were last in Town by
giving a promise - I am
very grateful for your
kindness and that of all
my friends - for a man of
my age and feeble health
is really not a desirable
guest - But enough (too
much) of this -

About the Governor to be
I quite agree with you -
- Some action should be
taken before long - There
are two vacancies which
ought to be filled by Morris
and Mactruald - I have
half

half a mind to write to
Dr. Allen - I felt to ask him
whether he wished ~~to~~ to retain
his seat - to Mr. Bridges
also - and I think a
Statute should be passed
vacating the seat of a
Governor who fails to
attend a meeting of the
Board for a certain number
of months - We can
talk over these matters
Saturday -

I am glad to learn from
Torance's statement that
there are some good things
in store for the College
hereafter

hereafter

Day Apr 182

Wm Day joins me
in kindest regards to
you and yours -

Yours sincerely

Chas D Day

SMITHSONIAN INSTITUTION,

WASHINGTON, D. C., May 19 1882

Dear Dr. Dawson:

I am in receipt of yours of May 16, and beg to enquire whether you wish collections intended for the Museum of McGill College to be addressed to the "Peter Redpath Museum"? Does this replace a separate Museum of the University? Of the two establishments, namely the "Natural History Society of Montreal" and the "Peter Redpath Museum", to which would you prefer to have zoological objects sent?

Yours very truly,

Spencer Baird

Dr. J. W. Dawson:

Principal: McGill College
Montreal.

WASHINGTON, D. C. - May 14 1888

Old Board
Chas. R.

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

Anden, Morse
Troy, N. Y.,
June 4th 1882.

My dear Principal Dawson,

I should be very much
obliged by your forwarding
the enclosed to Mr. Rankine.
I do not know his address,
otherwise I should not thus
trouble you.

There is a little matter
touching the college which I

think had better be taken
in hand now. In order to avoid
a press of examinations work
at the close of the forthcoming
Session, it seems well to ap-
point near Christmas as the
fittest time for deciding between
the merits of the new Shakespeare
Prize-candidates. The students
will be less burdened by such an
arrangement and the work they
may do during the holidays will
have greater effect. A very brief
announcement in the Montreal
papers will give timely warning.

I sup

it

I spoke to one or two of the men
who thought of competing, before
I left, and told them what I
meant to do, but there may
be some whom my words have
not reached.

I trust that you enjoy
good health, for I know that
your summer duties will be
unusually arduous this year.
Many of them will be pleasurable
to one who like yourself, rejoices
in being in scientific harness but
your Municipalship brings with
it so many persistent and irritating

trifle, that your leisure, which
I am tempted to call geological
leisure - has to be snatched from
business, educational and other.

I am resting in my beloved
home but not resting although
I am comparatively lazy. I have
fairly broken ground in regard to
my new courses of lectures and am
designing and painting a series of
small maps to illustrate my
talks on History. It is not what
I could wish but it may be of worth.

With very kind regards to Mrs
and Miss Dawson and to yourself,

Believe me
Yours very faithfully,
Chas. E. Boyce.

7 St. James' Street
Montreal 14 June 1882

Dear Dr. Dawson,

In the examination
of the accompanying statement
of expenditures for the Logan Memorial
Fund, I have discovered two
errors in vouchers (nos 21 and 5,
I enclose them for your inspection)
which makes the sum I have to
pay you \$1632.66 instead of \$1638.52.
I enclose my cheque for the former
amount, and would be obliged if
you would kindly receipt and

return me the Statement, together
with vouchers for it and v.

Yours truly,
W. B. Brewster.

7 St. James' ^{Grave} Street
Montreal 16 June 1882

Dear Dr. Dawson,

I have received
your letter of the 15th inst.
enclosing receipted statement
for \$1642.00, also the two corrected
vouchers nos 26, and copy of
letter addressed to Mrs Stewart
relative to the donation from the heirs
of the late Sir W. Schuyler to the
New Redpath Museum.

Return as requested by Richardson's

Memo of expenses not yet
charged for.

Yours truly,
G. W. Brown

No. 1. W. Dawson F. R. S.
Infil College
Wentworth

Montreal July 10/82

Dear Sir:

Yours

I received your subscription on Saturday for which please accept our thanks. The wood-cut you speak of as being in your office will indeed be useful to us as we have decided to retain the old name & the expense of a new cut would be considerable.

The paper we propose to publish will be a sixteen page monthly four pages consisting of standing matter such as advertisements - title &c. For the eight numbers issued in a year the cost of printing will be \$204.50 if 300 copies are printed in an issue.

Towards defraying this expense we have \$55- promised us in advertisements which by a little canvassing can easily be raised to \$75- leaving \$132.50 to be raised by subscription. Now to publish 300 copies we would require 275 subscribers as 25 copies will be needed for exchanges. Supposing then that we only get 275 subscriptions

we will have \$142.50 towards paying the
the expenses other than printing. These like
will not probably exceed \$20 so that & the
we will have \$122.50 towards you
improving the paper or the expenses of prop
next year. But we expect more than ed
275 subscriptions & it is only reasonable prop
considering the number of graduates un
& students. If then we get sufficient cerle
material to fill a larger paper than pla
I have specified we may perhaps gna
publish one twice as large as that pap
upon which we have based our of
estimate. With reference to material han
several of the graduates have promised shu
to contribute articles & it is expected num
that some of the professors will do by the
something towards filling the columns In
of the Gazette. Our difficulty here pro
will be how to induce the students me
to contribute for to have a college run
paper with its contents supplied by gna
graduates would be to lose sight- to the
of the chief object of such a paper

The encouragement of a taste for
literary composition among the students
& the affording of a field for its display,
your advice as to the election of a
professor to the post of managing
editor will be followed if any
professor can be found willing to
undertake the work. The students
certainly will offer no opposition to a
plan which promises to raise in so
great degree the general tone of the
paper as this does. The management
of the Gazette will be in the
hands of editors elected from the
students of the different faculties the
number from each being determined
by the number of its subscribers.
In order to prevent any ~~trifling~~ disputes
from taking place & to ensure the
methodical management of the paper
rules will be drawn up for the
guidance of the editors & submitted
to the approval of the subscribers.

The committee will supply the editors
with sufficient material for the first
number & then after giving over the
money they may succeed in collecting
their work will be done. In the
meantime any advice you may be so
kind as to give us will be gratefully
received.

Yours respectfully

W. H. Turner.

Chief Engineer's Office.

Montreal 4th August 1882

Dr. Dawson
Principal McGill College
Montreal

Dear Sir,

Kindly let me know if you approve of the accompanying sketches for black boards, and if so I will order them at once. The price for the whole five is \$47⁵⁰, exclusive of the slate slabs.

They may be cheapened a little by making the frames of a rough temporary character, but I understood Mr. Bovey to say that they will probably be kept for permanent use in the College. I trouble you on account of Mr. Bovey's absence.

DICTATED.

Yours truly

In answer
Sept 82

My Dear Mr Dawson

I was glad to learn from
you note the extent of Major
Mills bequests to College
for the purpose omitted the
Starch Bay stock.

I have seen Mr Morris
Heave the nature of that
trouble about Mr Mills
& the insufficient provision
for her. We will of course
in common decency have
to do something for her.

I hope that she is well
disposed, because this
omission to provide for
her, coupled with Major
Mills' known peculiarities
might give her, if advised

2

ly than disposed to litigation, the opportunity of putting us to some further trouble, - as in the 2d case. - I think that it will be well at the earliest possible date & while she is well disposed, to have her confirm the Will by taking what is given her & by some agreement by us & the Bishop in her favour being made at same time.

The amount to be allowed her, should I suppose be, what is needed, with what her husband has left her, to make her income ^{up} to about what they have been in the

3
habit of spending, - so
that no inconvenient
pinching may be felt
by her. - When the
latter sum is ascer-
tained approximately
we will know what we
should add. -

I was at the Museum
the other day & very
glad to see how far
the work has got. - &
though I know you have
greatly overworked
yourself, it must be
a satisfaction to feel
ready in great part
Yours faithfully
Murray

Montreal, August 26. 1882.

Dr. J. W. Dawson
McGill University

Dear Sir -

Would you kindly venture some explanation why a number of the Graduates were not invited to so important a University Event as the opening of the Museum. Some of them (and myself) have felt hurt about the thing, especially as we have been informed there was plenty of space and that whole families of outsiders, including boys, were asked. No public invitation to the Graduates was ever issued excepting, I understand, a vague remark or so on the afternoon of Thursday.

Yours very truly
W. Douw Lighthall

Physicist.

Director, Salisbury, etc.

41st North Lane
Salisbury

Salisbury August 25. 1892

Dr. J. W. Dawson
McGill University

Dear Sir -

It is a pleasure to hear that you would have been present at the opening of the Museum. I am glad to hear that you were so interested in the progress of the work. I am glad to hear that you were so interested in the progress of the work.

Yours truly
J. W. Dawson

Some of them (and myself) have felt that about the thing, especially as we have been informed there was plenty of space and that whole families of out-riders, including boys, were catered.

No public invitation to the Governor was ever issued excepting, I understand, a badge remark or so on the afternoon of the day.

Yours very truly
J. W. Dawson

Montreal Sept. 12th 1882.

Prof. Danson.

Dear Sir.

I hereby send you a small Account for work done in the month of June up to the day I left the College. I have been unable to call since that day as the Pianosforte Establishment with which I am connected gave me the Option to make my attendance at the Store or fished one or make room for some one else who would be there every day for a number of hours in the fore and afternoon. All the work of mounting and repairing Specimens could therefore be done only at my house, and I shall be happy to attend to all such Orders that ^{you} should receive at the old address.

Yours most respectfully
P. Huebner.

Chicago

Oct 12/82

My dear Judge Day

I am send you
the memo prepared,
which I have not been
able to get copied; but
which I hope you will
be able to read.

When you consider
that in the fall about
two thirds of my time
and half of Dr Hanington's
represent all that can
be given to subjects which
in winter employ three
professors and a lecturer,

McGILL UNIVERSITY ARCHIVES
ACC. NO. 2211
REF. 85/21

You will easily understand
the burden under which I
labour and which so distresses
me that I feel I cannot
sustain it for a long time,
I cannot however make
any public appeal in the
matter; and if my
belief turns up must
look forward to returning from
the University at an early
date, in the hope that
when the work is left
to itself the public will
be stirred up to sustain
it.

Truly yours

W. Dawson

Redpath

The Manor House
Chislehurst, Nov 22. 1880.

My dear Principal Dawson

Your letter of the
tenth affords me the great
gratification of learning that the
advantages which the Museum was
intended to furnish have already
been made manifest, and that the
space which a portion of the specimens
occupied in the old building is
very profitably utilized.

Hutchison showed me the elevation

to

to which you refer. I thought some
of the details might be improved
but the ideas are good. It would
be a wise thing to have a general
plan, the different sections of which
could be erected as circumstances
required and the means were found.

I thank you for the paper on
"Fossil plants of the Eriam and
other formations" - I wish I
could understand it. It is
worse than Justinian which I am
now trying to wade through, but
I like to have it for all that.

Judge & Mrs Day have now been

some within eight days - The Judge is very
red feeble but does not seem to ail much
could otherwise. They are all now out for a
real drive which I begin to fear will be too
which prolonged.

I shall be very glad when your
much needed holiday comes. We
shall then, we hope, have the pleasure
of seeing you and Mrs. Lamson here.
I sincerely hope that D-Teach will
have sufficient strength to perform at
least a portion of the duties of Principal
in your absence. I would rather see
him do it than any one else. The
Judge intends writing to you by this
mail. I am glad to learn
from

from him that the suit against thecott
heirs was successful, and that it was
probable they would not appeal. If the
Property he brought to sale, the College
or the Hospital should buy it. I want
the Hospital to get the whole of the property
behind the ~~existing~~^{Hospital} buildings. If the College
buy at the sale. It might pass to the Hospital
which would be a very good debtor as its
finances are in a satisfactory condition
I hope that help for the Natural Science
department will come from some quarter
and that the Scott endowment will relieve
the Annual contributors to the applied science
department - I do not like these annual
contributions - The coloured preacher who
had lost all he had, by speculating said both
he and his wallet felt as if they had been run
over by a freight train - I feel that way myself
just now but have not the same cause for regret that
the Reverend plate Johnson had -
My wife unites with me in kind love to yourself and
Mrs Dawson and Eva. We have not yet heard
any thing of George - Yours very truly
Peter Adolph
Municipal Dawson member.
