

High School, Thursday.

My Dear Sir William:

I should like to go through
the 'Reopathic Museum', if possible
the Van Chemical Laboratories, with
our Senior Class on Saturday morning
next if it will not inconvenience
you in any way.

We all feel very keenly the loss
to the University of the deceased Professor
Spurr his kindness, tact, & wise counsel.
In our Church Session, I learned to
appreciate even more the worth of such
counsel; and, at present, it looks as
though Mr. Ramsay's loss is irreparable.

I hope there may be found among us
some who will be willing to give their influence
to the University, to give you a strong support
in this constant struggle for Protestant
Education in this Province

For your kind note of Christmas
day I feel deeply grateful; but should
think if in any way I can aid you
in carrying on any dept. of Education it
best, in the years which God may
grant you, it will afford me very great
pleasure.

I remain, Dear Sir, Wellman,

Very sincerely yours

Geo. W. Kelley
