Genl.

I recd & for of Nov 2
 sent to my wife of 20. They
 to state that my idea was
 to prepare a work about night
~~see for~~ from one of your last
 Books of mine from which I
 have seen and think many
 of them from the English
 Genl has known. The
 work I propose would be
 a "Text book of Practical
 Surgery" and would
 consist of the following des-
 patchments. 1) Pathology
 or how to study books in hand
 specimens 2) Petrology or
 anatomy or how to study
 books on the large scale
 in the field 3) Geology
 Charles & Pulverentel ^{two to}
 part of the subject of ^{study}
 and of part of life.

These heads would not
all there is need to
enable any one to say
what is but the subject
of July

As to illustrations, for
my sketch July and shapes
I am sure between two
of you cuts ^{very fine ones} sketches of
middle ground and could
show some other here. — The
will be your for 50 additional
cuts for which drawings would be for
press or copies sent for prep books
sent. Perhaps there may be a
cost of 1000 or so for you who
could save some of the expense.

I have the greater part of the
material now as prepared for
my lectures, and feel
green ahead of the
prep next year.

As to Copies for Canada
