My dear Sir,

I have read
with much pleasure,

though perhaps not
quite sound faith;

Your paper on Archaeo-
zoology forms in

fortunately it falls

altogether beyond our

field, which is limited

of Natural History
and Geology. It would
of course excite contro-
versy and dispute,
and those who
differed would blame
us for exceeding our
limits. In these
circumstances, I have
no alternative but
to return it, though very

You however in the
name of the Editing
Committee for your
kindness, and assuring
you that any com-
municator of a geological
character will be thank-
fully received, should you
so favour us.

I hope the mee-
ting will be held at
its next point. It

finches very hard
here as well as with
you; though our business
men have with few
exceptions managed so
far to struggle through

With sincere good wishes
Yours truly

J. Dawson
