It is it happens that the  
system should be converted  
into electric and cable  
the old values are not  
filled for their duties. What  
Spencer wants is justice  
and liberty and  
protection in his industries and  
properties and there being  
granted he will not even  
hardly mind about affairs  
of state. His cardinal  
is in many points diff  
ferent that of Locke, and  
it will take by way to  
induce him to learn a  
way of the true will.
