

The title was suggested
by Goudier excellent but look
à les Rechaînements du Monde
Animal? and seemed to appear
pressing the paper needed to
rejoin the links together of the
and independence of form
of life without imply their
~~upon an~~ chain me for another
while it remains as there
Nature cannot be ~~even~~
~~sculpted~~ were put together
them but there the
chain of life when last links
are the of human shall need
be supported by an almighty
hand.

2
Near the links which
connect man as the one
beast with the beast and
olden form of life with
the the current form with
the form of the future.

In relating examples
and illustrating the
rule has brought us
far as possible the
last journal to the
highest grade in order
popular with interest
and his endeavor to present
a fair and impartial
a picture of much of the
actual state of ^{Principle}
with us little of which ^{shows of such} ^{as possible}

That in a work at
once so wide in its scope
so popular and extensive
in its character and so
crucial in its denunciations
may imperfections and misprints
will be detected & specialists
for correction. I feel confident
however that it will stand before
the man with a strong, a firm
basis of true facts, and surely
about is uncertain or irrelevant.

The plan adopted in this
work has been to select
representative types of life, - to
note their past River appearance
and to trace their onward
advance only those forms that
have been dropped and
have been extinct and
those that have been coming
of the modern time. There
is some novelty in this mode
of viewing the subject and
it gives great facilities for
presenting the facts and
causes of the general trend
which ever sweeps waters
may find in it more
things new to them and
some aspects of their past
experience which have
not occurred to them
previously.

Proface

Decisions as to the age and long
life are not at the present
time limited to mere ^{philosophical}
and practical ^{speculation} ~~imagery~~ ^{they} ~~perfectly~~ ^{by}
~~have~~ the ~~colours~~ ^{other} ~~features~~
are now ~~supposed~~ ^{clear}
on the facts of ~~biology~~ ^{and} ~~palaeontology~~
and many in these facts the ~~bold~~
speculators ~~suppose~~ ^{they} ~~are~~ ^{able}
to ~~have~~ ^{to} ~~decide~~ ^{for}
and to ~~decide~~ ^{decide} ~~all~~
as ~~beliefs~~ ⁱⁿ ~~the~~ ^{future} ~~man~~
and ~~unreal~~ ^{distances} ~~of~~
man.

~~It thus becomes necessary~~
~~important that their departure of~~
~~been what they want left a few~~
~~best must be~~

No ~~just~~ ^{for} ~~much~~
agreement is now to ~~some~~ ^{clay}
connected with their ~~speculations~~
that ~~what~~ ^{what} ~~states~~ ^{to}
the ~~mean~~ ^{of} ~~pro~~ ^{of} ~~of~~ ^{of}
discovered ~~of~~ ^{palaeontology}

and none is more important
than by the men whose views
on the one hand they present
carefully selected series of pure
animals or plants, as ~~well~~ as
descendants of ~~artificial~~ ^{artificial} selection,
on the other hand ~~they~~ when
they present facts & present
the requirements of the facts they
~~declare~~ ^{affirm} as to the ~~importance~~
of the kind or of our knowledge
of it as ~~involutes~~ ^{any}
kind of ~~prejudice~~ ^{prejudice}
open to the hypothesis in question.

It is in these ~~unmistakable~~
undoubtedly that those who
are not specialists in such
matters should be as
wonder to judge for themselves
and it does not appear
impossible in the present
state of knowledge to present

in terms intelligible to the
general reader but a new
of the excitement deeper
of form & life as they seem
at one to pure created
and clearly views of the
great plan of creation and
to prevent the deception
of pseudo-scientists from doing
their evil work. Difficulties
we don't attempt but an attempt
may be for the ^{common} ~~the~~ center of
the mass of facts already accumulated
and for the ~~constant addition~~
of new facts which there are
accumulated and also for the
new facts which seem to us
knowledge, still ~~there is~~
~~that the same has~~
~~assumed other effects~~ ~~the same~~
have already been made with
some success and ~~the~~
factors for still in complex
keep on such new ~~the~~
can be ~~seen~~
