

J. M. Dawson

of Whites numbered ~~samples~~^{specimens}
should also be ascertained correctly
& added, some of them being interesting.
The specimens I will send by
Mamma, & also I hope to send a
few drawings of the more interesting
& new varieties which if the form
list is published should if possible
be published too. To some names
of which I am not sure I have put
? The Table should also as far as
possible be arranged according to
depth. I have numbered the
greater part of it with that intention.

I cannot get a copy of Nicols here
& would be very much obliged if you
could spare yours.

Since being here I have found no less
than two specimens of Appochois
(? spelling) on the beach, both however
in bad case I suppose them must
have come up on lines, & been brought
ashore with them.

I got a very good specimen this evening
of a Lepidostrobos, attached to the stem
which I hope to send you. In going
along the shore from Kierkaldy to
