

Montreal

July 7<sup>th</sup> 1892

My dear Anna

I am sending you by  
Post to-day, a Preparation  
of charcoal, given by Dr.  
Malson to one of our  
nephews who was a great  
sufferer from dyspepsia,  
& has been cured by it.

It seems to me it would  
be well for Eric to try  
it, for it will be good  
for him to gain strength  
if he can eat so little.

My heart & thoughts are  
with you a great deal, for  
I realize your anxiety &  
how lonely you must feel.

That Dr. Trudeau & Janey  
would be a good authori-  
-ty on lung troubles & I feel

with you. That it is strange  
Dr R & B did not find  
out long ago that there was  
serious trouble. I do not  
blame you for feeling doubt  
in their treatment of the  
disease. For they have not  
shown much skill in  
detecting, so I do hope you  
will consult some one who  
has made this disease a  
study & who is an authority.

Bernie will be a help com-  
fort to you, but I am afraid  
he will find Eric greatly  
changed, & dear Anna trust  
all in Higher Hands, & re-  
member what little I can  
do I stand ready to do for  
Bernie's children are dear  
to me too. I only wish the  
power was mine to relieve

your anxiety. I do not know  
any Dr. Hays who makes any  
troubles a special study.  
Dr. R. has gone to England.  
I am glad you have continued  
good news from Gretis so you  
can have an easy mind  
about the children, I hope  
Lolore will hear her husband  
believed lightly. I am writ-  
ting hurriedly to explain  
the package by Post which  
you will probably wonder  
about it. Was sent from  
the Chemist's to save time &  
I hope it may benefit Eric.  
He shall probably start  
for Battery Camp on the  
16<sup>th</sup>. Hoping that the cooler  
weather may benefit Eric  
& with love to you both I  
am affecly yours  
Louisa G. Johnson
