

if you are for us
all set us by
of eyes in fact we
of new wisdom
that is all the
children you see
& let me know the
are managed & the
results -
Sincerely
Anna

Bernard,

It seems a long
long since we said good bye
though I have as yet scarcely
realized that you are away.
I find myself looking for you
at various times & seasons
& mentally referring questions
to your decision from sheer
force of habit & against the
light of reason.

Your father & Laura
left early Saturday & I spent
most of the day in putting
your remonstres away, to-
curing against mother etc.
George came down in the
evening. I intend going in the
this week - The Vancouver case
is to be his summer's work
& he talks of trying to get a
steam launch & to take them
about if possible he seems
cheerful & spoke much of you
& your plans - he says there
is a capital mining school at
Zurich & advises your going.

direct - to Cook's Agency as to
routes some of their circular
tickets are cheap & they under-
take to give information
about - every route & mode of
travel -

our hot-weather continues
still no rain - the trees
almost in full leaf, & the
gardens overflowing with
narcissus & bleeding heart

I have just come up from
tea at the college - our matron
is there, en route for Ottawa

This B.A. paper is so
nice & smooth, that it is a
temptation to write on it
if you don't object to the
half sheets - Clara is anxious

to know if in case of your
being very sea-sick the sailors
will telegraph to us - & Edith
inquires as to whether you
will have any fireworks on
the Queen's birthday - I fancy

I shall have to devote myself
to pin-wheels on that festive
evening, as Geo. has given
Eric money to purchase these
luxuries - Eric & Edith went

up to Mrs M's this afternoon
to tell her you were off etc
& I hope they got through the debt
with credit -
