Dearest Love

I wrote you
two very hurried notes yesterday
one to Bessie - the other to Winnie
merely about papa - We had
a very serious fright - about
him, but - now thank God,
I hope the danger is greatly less-
ened. If not altogether passed.

I was sitting on the shore on
Sunday afternoon - ~~the~~ baby Vera
with me - the others at Mr
Fager's meeting, when papa pas-
sed with his Bailey & son who
had appeared from the woods &
some explorations - I spoke a few
words to them & they passed on
towards Tremholm's - It is not
been here 10 minutes when I
saw them coming back & papa

who was ahead seized in a most
agitated sort of manner. "Where
is Dr. Oliver - What is wrong?" I
said. "I believe I have fractured
my skull" "I have had a bad fall"
he replied. I sprang up & saw
blood on his face. I set Eric off
full pace to the service to find
the Dr. I looked round to see if
there was anyone to whom I'd
give help - but no one was near
so I took him under my arm &
flew up to the house with him.
I got over the fence by the time
Papa reached the house - Mr
Bailey looking fearfully scared
had not even offered his arm
& vanished promptly - Mother
& I at once got Papa propped
up in bed, boots off & hot
water to his feet - cold cloths on
his head - he had a very ugly
swelling on the crown of his
head - & he declared the bone was
bent in, if not broken - We watched

and seeing her very symptomatic of sickness of brain
her it - was pale, her knees before Dr D - was
got. he had given me a report of his young
above our job here I should be had some or
further - on observing he remembered that some
old local glass by her in his cell etc. & as a cream
had meanwhile collected at the shore, in a very
few minutes all were collected from various
neighborhoods - while a piece of the rock had been
raised from the shore towards the end of the bay
was exposed - Dr D. claimed I observed it - very
carefully I had not observed him to raise the
wood piece (now temporary covering his chief head being
that the ^{water} ^{is} ⁱⁿ ^{the} ^{water} had damaged the base of the
brain & that explanation might - not - be -
I might have also observed no book paper or any

meeting alone, but in a state of ignorance &
in a few weeks & a few months later today
the patient has recovered - he has been very
good & patient - but we fear his father
being ignorant before the end of the week
prescribed quinine - his mind - who is now
quite in a kind of a state of mind - who is now
as before to the end of the week - who is now
Do - is very much better - in being kept
from his work & several in having to keep
himself from sleep & sleep - in only some few
few days & has no medical symptoms - I have as
usual been a frequent contributor of medicine.
Vapor says he advised his feet - & medical treatment
with all his might - against - a sharp rock in
hot a spirit - however flying off -

now - I just watch him a little

Don't dear, let - things vex you
or abuse yourself for folly it is
the last-thing you can justly
accuse yourself of - a want
of self-confidence wd be a much
more just-line for you to
mark upon - if you do the
best - you can with your
knowledge & good judgment
it - is all you can do & I don't
see that you need trouble
further - No one can best
Tom Macaulay can be "cock-
sure that he is always right"

We have not heard from
you - for a long time - Had a
letter from Rankine lately
fr - Columbus I think?

Miss Linn goes Thursday
& already the hotel dwellers
give symptom of flight - a very
short summer they make of it
but it is late - I have been
shooting letters at you a little

now - I just watch him a little

Don't dear, let - things use you
or abuse yourself for folly it is
the last-thing you can justly
accuse yourself of - a want
of self-confidence wd be a much
more just-line for you to
work upon - if you do the
best - you can with your

Tom Macaulay can be "cock-
sure that he is always right"

We have not - heard from
you - for a long time - Had a
letter from Rankine lately
Jr - Columbus I think?

Miss Lewis goes Thursday
& already the hotel dwellers
give symptom of flight - a very
short summer they make of it
but it - is late - I have been
shooting letters at you a little

wildly, but as you have given me no guide
I conclude writing is over the subject nothing
I hope you will have done with thought, by
the time this reaches - I wish to be in the City
sooner, the nature of my - I have never known
as she be in society & otherwise - but has been
yesterday - making, as taking for the last week
Victoria, & report himself well & flourishing.
I have look on little the Swan - I hope soon
to have English news of you also -

Truly
Yours

Anna

Don't tell me that this young fool goes
them in great numbers about her baby, suggesting
some kind of nurse but I have agreed to
I am of baby & nurse but I shall do as I please -
I am to have a - I shall do as I please -

Little Lutes
Sunday evening
June 26/88

Dearest B -

I have at last
got all the young ones to
bed - & dinner time seems a
long time ago. It always seems
to me one of the crises of life
that Sunday sh^d not come
as the jewel of days, with a
perfume special & peculiar, &
a time of rest, but - be a
special weariness to the flesh
& anxiety to the spirit. That
is one of the things that I
always feel resist - somehow
be my own fault - but I never
have succeeded to seeing my
way out of it -

The weather has been lovely
& we had an address from
Mr. Hoque here, wh - was very
pleasant & simple, & an improve

meant upon our fowls a
young Shropshire protectioner
who has spent the winter
here shepherding the Inetis flock.
I had quite forgotten to
send this bill back to you
which is right & ought to be
attended to -

Baby will very soon walk
and indeed he quite often
takes a few steps alone & is
most expert at climbing rocks
on the shore, & scrambling
away from his caretakers.
He will not try to talk & in-
sists upon calling horses,
haw - waw as well as dogs &
gets much excited over the
numerous chaws wh. fly by.
Conrad is always overflowing
with energy & activity not
always devoid of mischief to
Kuth. came screaming across
the grass today - Conrad in
hot pursuit with a long
stick in his hand - I called to
him stop stop you must
not hurt Kuth - bli, he replied
slackening his speed "I was
only playing that she was a cow"

I took time to church today. The sermon was
very poorly well - occupying the sermon time
by distinctly regarding how small children be
divided with

I about like to breathe ever by asking for
no money things, but - if you get give me the
snacks I make notes of the children in - how well
find them in the West cupboard of my desk?
I only want the I belonging to this set of them
I have neglected them, I had like to work them
up if possible - the other I are also right - I get
state - the last few days I have been working
with a kind of booklets that contain many
through my book - the book the same opening page
really has no call to act that I know of
perhaps something else not act, if it is not
as I need not make a comment about it -
don't think it is worse than other things, in any
case? we can complain of it in due form, not as

Something
of Harris little friend Wm. Deane is to
be shown next week, so who will be met
with a friend - I have heard nothing as to the
plans of the Society or others - I am told that
the house next door is let as likely to be built,
hope it is not - the case - we went over it - a
few days ago, I think it is as well if not
better furnished than any house in the place.
clothes carts in great numbers, nice catches &
the doors etc etc - I do not see any
the ground just business - well, we have
heard from G. & W. at Cambridge & they are
G. - caught up with W. at Birmingham & London.
