

Waukegan, Ill

1899 to

Bernard S.

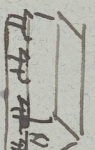

I went to her
to see the dinner
went off - -
Dear - Bernard,

I am glad to get
your first note & to hear that
all is going well. Today is
beautifully fine & warm
enough for to be pleasant, we
are to go for a drive this
M. In. I could not get a vehicle
this morning which shows
that - the place is still full.
After October the prices
diminish but not till
then - there is one boarding
house in the neighborhood
said to be good, but always
full. I shall have a
look at it - later on & in-
quire about prices - Every-
thing here is very dear, the
table certainly is very good
& the people feel they are in
the country, keep early hours

I arrive & play golf, I wear
short-shirts - A lovely at-
our table a Mrs Safford is
very pleasant - I chat, do
very proud of her English
descent - Another piece
old lovely who sat vis-a-vis
gives tallery Mrs Motley has
departed her lovely companion
was a Comedian a Mrs
McDonald whose husband
was in some government
position, & fell a victim to some
sort of slow paralysis, & is now
in St Margaret's Home!

Evening -
Mrs Safford suggested our
going to the Goff grounds
this a.m. - so we went - the
links are almost - perfect
ular but - they have a charming
little club house - & a just
fact - since we went - or up?
up to the top of a very high
hill - encountering the other
climbers who were also very
friendly - The views were
simply lovely - we came back
a little late for dinner &
had to hurry, as we had

answered on "Jubilee" Jan 27 - we show I do
not about - 15th in going out to show the
& each another way, it is not unlike
some of the author's scenery only was
not green & smiling - I did not expect as
one perfect - I cannot of other of the
& reflecting water, & the fracturing clouds
& autumn colors; added beauty to the
we stopped to see a small fern
we were back Berkshire suggests big
I about a hundred acres mostly
shown from in a long line
on horse back - I then saw the
structures most clear to the
& the part of them by a river
each still had a number of
black water, ^{of} ^{the} ^{same} ^{kind}
the most thin ^{of} ^{the} ^{same} ^{kind}
only leaves of all but of - ^{of} ^{the} ^{same} ^{kind}
pink - ^{of} ^{the} ^{same} ^{kind}

rephrased - of each animal - the oceans
is represented by the secreted mellaes & sent
to the creamery, the skin with 2 horse carriages
to the bookbinder - a sewing case having
up on parts -  each half - having one
mullet on the ~~top~~ ~~side~~ with hair as a holster
between hair & hair - such as cola,
I must also tell you that the young boys
I met - in the cab called fresh mud & water
in to 5 - or tea who is staying with the
mules of the town, as one of them said by
name - they have two knives here & felt
them with 2 wools observing the three seem
over months, selling them the Eastern &
Western Knives - his tail was sewn &
then sent also his two daughters & two sons
some betters -
Another funny thing there is a "bark"
just opposite to which comes the brushing
& lawn grass - but this bark cut - has a long

central walk & old & handsome
trunks of elm trees is the shape
& size of the Great Eastern
Crosses trees & dots & dots

This town oc-
cupies about half of the mar-
sable & houses the far side
of the office. I have only
seen one family of *Taenidia*
but they were not pretty
enough to paint. The woods
are lovely - plenty of beech
trees, many noble elms, & two
maples - that were huge -
quite surprising, & must
be very old. We also found
a few late raspberries,
fine quality - & some stones
in a dyke full of garnets
the stones are very pretty, &
mean in the walls, glittering
with mica or pyrites or
something - plenty of hem-
lock trees give a variety in
the woods -

Bernard has taken
several photos - but according
to his mind & tastes, so I hope
they will be good -

He is most comical, & ob-
jects to going long walks,
but that is absurd. - I hear
there is a celebrated maple
sugar farm where such a
lot is brought & he will
have to go there - The bills
of fare is of unceasing
interest - to him he studies
it carefully - & elaborately
of he masters his lesson
as well this winter, it
will be excellent.

In many places large
hill sides have been planted
with trees mainly maples,
with a view to sugar wh
is about 18 cts a lb -

In the school there are
36 children in the primary
& 50 in the grammar.

The subject of the Billings
large land owners must
be left - our till next time
you must - begin to feel
you know a bit - I would like
you might - send this on to
Clare - as it is so descriptive
much love dear & try & get the
comfort of life if there is any.
Love dear Aunt
