

Oct. 1869
 Dear George

I have sent by this
 mail to Mr Dallas, of the Fort
 Worth, a short paper on
 answer to Mr Carruthers,
 and also a notice of
 the supposed new reptile
 and Cophylaspis. I wish
 you to take it dead
 to Mr Dallas. The casts
 sent by you, but would
 like first, if you have
 opportunity, that you should
 ask Bailey or Sturges
 what either of them
 thinks of the joint,
 and whether I would
 be justified in regarding
 it as reptilian, if the
 microscopic structure of

The true elements that
of Paphos planets, which
it actually does.

When you see I have
I wish you to ask him
whether, in event of my
being in London in
April, he knows of
any opportunity that
there would be to
ventilate some of my
views as to Scripture
and feelings, with the
view especially of doing
good to the young
Scientific men, but
please do not hurry
about this.

I hope that by this
time, & soon after,
you will be settled
in London, and at
work; and I can
assure you it is my

daily prayer that God
may bless you and
care for you, and
that you may prosper
in all things. Send
me a note for
Prof. Williams, which
please to pay & mail.

I should have said that
in event of Ames not ad-
mitting the Republican character
of the book, it will be better
to delay the paper till I
come. Please pay so to
Dallas.

My dear Mother
I have just received
your kind letter of the
10th and was glad to hear
from you and to hear
that you were all well.
I am well at present
and hope these few lines
will find you all the same.
I have not much news
to write at present.
