

41 George Place  
Tuesday,

Dear Sir

Your letter arrived  
this morning, and the boxes  
reached me safely at Oxford.

I think you may  
send Hunt's copy of Purney's  
paper direct to Montreal,  
and Logan's to the post,  
say Somerset House, or you  
may keep the latter and  
I will take it out with  
me. The Deaton earth  
from Maryland is not  
carpenters; I bought it  
thinking some microscope  
people might wish it.  
Please return it at present;

as also the pieces of pine  
wood,

The pieces of the Cur  
dentary I thought I had  
packed. If possible pack  
them in the box in your  
bed room.

Mamma has found  
her brooch and also  
kissed with her very slippers,

When you leave you  
may give Elizabeth half  
a crown for herself, as she  
is very obliging, and I  
save her nothing when  
I left.

All are well here  
and send love to you. We

I have had a little conversation  
with you about the  
In addition to your  
old plane instrument, Mr  
Andrews has been  
suggested and also  
Elie in life. I shall  
make inquiries and  
write to you again. Please  
look in the geological  
map as to the geology  
of Andrews. I think  
it has good coast details.

With all love from  
Mamma and me  
for being father  
J. M. Dawson
