

Little Notes
July 20/76

Dear George,

I have just re-
turned here from a short
tour on the intercolonial
and found your letters of
the 9th and 14th June. It
is well to find you have
got so far safe; but I sympathize
thoroughly with your sufferings
from wet and flies. However
I have to write now of more
important matters. On Phillips
death I wrote to you on the
subject of candidature for the
place. I write also to Selwyn
on your behalf; but he is soft
and slow, and expressed with
Phillips, exhibit, and while he
has been dallying with Whitman
about the matter, I have been
to fear that Dr Clerk a

Little
July 20/76

Dear George,

I have just received your letter of the 14th and I am glad to see to find you are well & happy; but I sympathize with your suffering however you get over this. I have to write you of your important matters. I thought I wrote to you in the light of consolation for the peace. I hope also & believe in your behalf; but his wife and her, and enjoyed with this, which, and while he has been daily with William about the matter. I have been a few that of which

French Canadian character
who has no merit whatever
except being a Frenchman,
was got some pledge from the
Govt. In these circumstances
I have thought it best to
write on your behalf, to
the Laird, so that they
may have no excuse if
they appoint Cresiel. I would
not have done anything without
hearing from you, but felt it a
public duty, independently of
your interests. What the result
may be I do not know.

I have just returned
here from a week's ramble
in the Mountains of St. Lawrence
& St. John - studying the metamorphic
edges between the St. Lawrence
valley and the Bay de Chaleur

But I am not a character
who has no merit whatever
except being a character,
and for some things from the
fact, in their circumstances
I have thought it best to
write in your behalf, to
the point, & that they
may have no concern of
they appoint series. I have
but have done nothing without
bearing from you, but feel it a
further duty, independent of
your interests. What the result
may be I do not know.

I have just returned
and from a week's residence
in New Brunswick I have
been - through the
to return to
reply between the
of the

examining the interesting plant-
beds at New Brandon on the
latter bay and study the
sections opened by the railway
on the Coleoptids. I also visited
the eggs and dug out another
reptilian trunk, full of bones,
and found Pupa vetusta in
another bed about 800 feet
higher than its original locality.
Unlike you I had fine weather
the whole time, and with
the railway facilities for
getting from place to place
did much work in little
time.

We are all here except
Anna & R. H. who are still
in Montreal where the heat
was been terrific. William
prepares to leave next week

We are all here except
 Anne & B. H. who are
 in Vermont when the best
 has been testified. William
 Prof. Brown next week
 has been testified. William
 in Vermont when the best
 Anne & B. H. who are
 We are all here except

had much
 getting from
 the railway facilities
 the whole time, and
 made for good
 paper than to ripen
 weather
 another had about 800 feet
 and found Papa Ventrata in
 reptilian trunk, full of bones,
 the eggs and dug out another
 on the tubular. Also under
 Eastern part of the railway
 later dug and through the
 back of New London or the
 Vermont the western part

To go on some railway
work on the Ottawa ~~29~~
we hope Anna will be
here.

We all send our very
sincere love and prayers
and good wishes for
your welfare and safe
return with many
new discoveries to
celebrate.

Your faithful
father
W. Dawson

At 8 o'clock on the 10th of
the 10th of the month we
were in the city of
New York.

We all had our very
pleasant and safe
and first night
for well and life
return with many
of the members of
the

Committee
