22nd November 1878.

Dear Dr. Dawson.

I was exceedingly sorry to read in the Times of the death of your distinguished father and trust that you will permit me to add my sympathy to the numberless messages of condolence which your family will already have received.

In addition to his world wide renown as a geologist, the name of Sir William Dawson will always remain associated in the minds of Westchester past, present and future with the rise of McGill University and its attendant educational facilities. It was never my good fortune to be a pupil of his but I know with what success his labours were attended and how sincerely his loss will be mourned

Yours sincerely
Hamilton Watson
