FROM
THE LIBRARY
OF
SIR WILLIAM OSLER, BART.
OXFORD

7666 y

This is the record of the cases seen in the Third Year Out-patient Clinic. It was held in a room connected with the Dispensary. The patients were selected by the men in the Dispensary and Sir William picked out those whom he wished to show. Occasionally he brought a patient himself who showed some interesting condition. There was no rule as to the number of patients shown - one might fill out his hour. The students usually had the chance of taking the history beforehand but sometimes first saw the patient before the class. In this event they had to take the history before the class - of course briefly - and Sir William gave many hints as to methods, important points, etc. The note under the heading "ward" shows the patients admitted to the hospital and where they went. Great stress was laid on the "Follow-up". Each month one student gave a "Round-up" - and the other students were expected to follow their patients and report the result.

This class was held on Mondays, Wednesdays and Fridays from 12 noon to 1 P.M.

In the latter part of the book will be found the list of subjects in which students reported - Thomas de Chae

The Johns Hopkins Medical School.

Record of Cases, Clinical Clerkships &c.

Third Year Class - 1897-1898.

Record of the topics given to students to report on. There were usually suggested by some point which came up in the discussion of the case. A name might come up - as Cornigan's. "Who was Cornigan?" Sir William would say. If the student did not know - "Give us a five minute talk on him next week."

The questions were very different, e.g. the price of potassium iodide in Dec. 19th 1901. If any historical point came up the student was expected to produce any original article available, such as Cornigan's original article, Gull's paper on "Anorexia nervosa" etc. The 'Round up' was a report on the work of the month. Each student was supposed to report on the patient he had assigned to him to the one responsible for the "Round up".

Thomas de Caze
