(Letter to Dr. Cushing)  
(typewritten)

10th February, 1912.

From the Regius Professor of Medicine, Oxford.

Dear Harvey C.

I am so glad you turned over that chromo. It is not really a reproduction from the Seymour-Thomas portrait, as the fool of a man made a sketch of me, but he had a photo. of the protrait, with which I think he tinkered. He had done Burdon Sanderson and several other doctors, and it was more out of pity than anything else that I gave him the job; but my friends have suffered - posterity will not know the difference!

As to the Congress, there are only three general addresses - Ehrlich, Chauffard and yourself. You need not be specially alarmed as Chauffard is not so far up the rung as you are, - and just about your age

Whether or not I could join you somewhere on the clinical "Rundreise" would depend on the month. June is impossible here. I might be able to get away early in July. I should like nothing better.

It is a great pity Welch could not be in the Senate; he would own the republican party in about a year!

Love to Kate and the Darlings.

Sincerely yours,

WM OSLER P.T.O.
