Dear Dr. Bushing:-

I am obliged for your kind and prompt reply. In your letter you write my name with the final E. The genesis is Le Clec - clec - clec - clark.

It is not surprising that you were misdirected as to the initials, for I was usually known as "Clarkie" just as Abbott was called "Rabbit" or "Professor Rabbit".

The mistake in initials of final E, occurs also on page 315. Vol I.

The biography is entirely satisfactory - I think it astonishing how truly you bring to light the real Dr. Osler - It keeps one "sob of smile down the lips and teary down the lashes".

The good he did will assuredly "live after him". You have made it certain that the memory of it will not be "interred with his bones". Please don't bother to reply -

Faithfully Yours
G. E. Clark
