

3 BRIMMER STREET

My Dear Doctor Cushing: —

In a brief pause between volumes of your "Life of Osler" may I express not only my great admiration of the work, but my gratitude to you for writing it.

I have been particularly interested in the portrayal of Sir William as a biologist and in his work with the Entozoa. Also, the picture given of the →

organization and the early years
of Johns Hopkins are very stimulating

Thanking you for making
this record for "a generation that
has not known him," I am

Sincerely yours

Edw. D. Churchill
