Dear Chief:

The Osler book is a masterpiece of good biographical writing. I think you have written the real Bible for students of medicine.

The 11th annual report has just come. I have always kept a file of them on account of the stimulating flagellations in the reports of the Chief. This year I missed them, & I wondered if you had gotten discouraged with scourging the pachyderms. I hope you havn't. Whatever lack of

effect there may have been locally,
others have found them wholesome
& refreshing.

After all why should you be
discouraged, with a book like that
& men like Sam and Johnny
& Elliot as your brain children?

I hope you can stop to see
us some times when you go on
western trips.

With best wishes

Sincerely yours
