E. J. G. BEARDSLEY, M. D.  
258 SOUTH 16<sup>TH</sup> STREET  
PHILADELPHIA

July 21, 1925.

Dr. Harvey Cushing

Peter Bent Brigham Hospital

My dear Doctor Cushing;

As Chairman of the Committee on Scientific Business of the College of Physicians of Philadelphia I have had so many requests from our Fellows that you be invited to address the College that I am risking your displeasure in writing you again about the matter.

in the late winter (any month from Feb to June)  
Could you not give us/the same Lecture that you will read in the Autumn in Edinburg?

There is a very heartfelt demand that Philadelphia become better acquainted with you. Please do not think me presumptuous after your courteous refusals to come to us if I am insistent. It is that I have the best interest of the College of Physicians at heart.

Very sincerely yours

*J. G. Beardsley*

We are all continuing to enjoy the fruit of your disinterested labor of interpreting Willim Osler to those who thought they knew the man during his stay here. Dr. J. Solis Cohen, now a prostatic invalid, read my volumes and shaking his head he remarked "I never did that man justice for I never could get him interested in drug therapy". I felt like saying Thank God for that. Its well that there should be one man not accountable for leading others astray in therapy.

*B*
