EDINBURGH.

9. 1. 26.

My dear Professor Basking.

It gave me a very real
gladness to get your kind letter of
the 12th December, referring to my
address. That you should speak of it
in such sincere terms made me very
humble and proud. Your 'Life' of
Osler is one of my most treasured
possessions and your appreciation
of the spirit of my work means more
to me than any mere words can
express.

I am posting this letter
the register mentioned in my last
letter. Hope I am not burdening you
→

in any way, with the
reprint of the papers on 'Disseminated
Sclerosis' & the 'Ostitis Fibrosa'. It
was Sir Harold Stiles, who has
asked me to let you have them.

Your visit to Edinburgh was a great
inspiration and will ever remain a
glad memory. May I say that I
would be so glad to send you a
few reprints of the address "The Spirit
Within the Spirit of Work" should
you care to have them for distribution.

With sincere regards

Ever yours,

James B. Dawson.

Sent by separate parcel.

Monographs on

(1) Disseminated Sclerosis.

(2) Multiple Neurosclerosis of the
C.N.S. (A discussion on
the Genesis of these Fibres).

(3) Generalized Scleritis Fibrosa.

Reprint of article on

the Lymphatics of the Spinal Cord.
