Dear Doctor Cushing;

Thank you for copy of your notes in case of Geo. Engert. I am disappointed, as I know you are, for I had recently felt almost sure we were dealing with a vascular meningioma tumor in the R. post-central region, or else an infiltrating glioma of that region just underneath the pia. Anyway I feel that neither the family or myself would have been satisfied without the exploratory opn., and we shall hope for some benefit therefrom tho' it may not be altogether plain just what.

I wish to thank you for your prompt assistance in this case. I was at my wit's end. I am dropping ~~George~~ a word of cheer.

I can not close without adding my one word of appreciation, to all the others which you have received, of your wonderful biography of Sir Thomas Osler. It is fascinating and was such a stupendous task which you set yourself in its preparation. But be assured it was well worth while for I do not know of anything which so stimulates one's soul and ambition to better work as does this master-piece of biography of a great master in medicine. Its reading has meant much to me, and I thank you for it.

With high appreciation, I am

Sincerely yours

C. L. Hanks
