My dear Sir

I have been engaged for a short time in the study of Entozoa more particularly those infesting fish & find great difficulty in getting the species described. On consulting Prof Dawson as to who would be the most likely person to aid me, he referred me to you & subjoin a list of those I have met with & the errata in which they were found; hoping you will be able either to name them or to refer me to papers in which they have been described

Bat Encysted Nematode in walls
of the stomach

Cat-Fish Iccinia, Distome, Encysted
nematodes in liver, Scolex of Iccinia
in kidney, Echinorhynchus

Chub Distome, Echinorhynchus

Pike Iccinia, Ascaris

Perch Nematodes (encysted) Echinorhynchus
Scolex in liver, Distome

Sal Iccinia, Echinorhynchus Distome

Squid (red) ascaris

Pickrel Iccinia, Bothriophthalmus
echinorhynchus

Menobranchus lateralis Polystome from
mouth & throat

Skunk Iccinia ascaris

Sun-Fish Distome Ascaris Echinorhynchus

Rufffish Distome

Bass Scolex in liver

Hawk ascaris

Crane Distome, Ascaris

Fowl Iccinia Ascaris

Bar-fish Nematodes in peritoneal
cavity

In closing I do not inconvenience
you or trespass too much on your
valuable time. Bel me & ore &

W. Osler
