3 TO 5 P. M

DR. THOMAS MCCRAE
1627 SPRUCE STREET
PHILADELPHIA

July 7th, 1921.

My dear Harvey:-

or rather the record of it,

I wonder if you have come across the animal parasite which was named after Sir William? It is the "Sphyranura Osleri". The article concerning it appeared in the Journal of Morphology, Vol. I., No. 1, September, 1887, published in Boston by Ginn and Company. I am just sending this on in case you have not happened to come across it.

With kind regards,

Yours very truly,

Thomas McCrae
