September 27th, 1921.

My dear Harvey:-

I looked up that reference to the stethoscope in the Medical News
for 1885. He ^{W.O.} never used that type of instrument himself after I was associated
with him. It is rather interesting, however, that one used to see that type of
stethoscope in Montreal and it is possible that it is still used there. I judge
it is probable that he introduced it there before going to Philadelphia.

If you are coming to the Surgical Meeting the latter part of October,
we shall be very glad indeed to have you stay here and it will be a very great
pleasure to see you.

With very kind regards,
Yours very truly,

Tammes.

*Why not bring Kaki along?
Why hopes she may decide to come - So-do I.*
