

W.O., to J. George Adami,
10.11.'93.

1 West Franklin Street.

Dear Adami: Very glad to hear how smoothly everything is working. You will, I am sure, gradually get all that is necessary. You have taken things so cheerily and have made the best of circumstances that the Faculty I know feel that they have a progressive and considerate colleague.

Johnston is a good fellow - but not lead enough on the keel. That Art. of his on Water Analyses in the Ref. Handbook is, I see, very highly praised, and from what I can gather, is really a good piece of work.

I shall order another photo for you. I hope you may be able to pay us another visit before long. Mrs. Osler sends kind regards.

Sincerely yours,
Wm. Osler.

Der Welch as Weigert calls him is fat and well.
