CUS 417/127.20

From the Regius Professor of Medicine, Oxford.

11th Jan. 1919.

Dear Hurd,

X
Greetings to you all for the New Year. I should have written before, but these are strenuous days, in which I get very little time to myself. The outside claims and the steady stream of visitors keep me pretty busy.

Hugh Young has been here this week, and is in fine form.

Did I not leave with you a set of remarkable photographs, showing Caseous Tb. ? Please let me have them; they are probably somewhere with the Hospital record.

Love to the girls.

Sincerely yours,

WM. OSLER.

What a splendid new gift this is!
