

Charlottetown
March 27th 1836

Dear Sir

We received yours of the 14th. We have had only 100 Harmonicous found since we sent over the lot to Picton. Our stock of Millboard was short and we did not care to bind them as you were not in want of them. Your orders shall be attended to and we will give every attention to having them carefully collated.

Your obed^t Serv^t
Hazard Owen

over

Dear Sir

Could you give me any information, as to the cost and ~~to~~ the best place for procuring a Nail Cutting Machine Britain or the United States. I have some Steam power to spare and the man who attends the fire has a good deal of time which he might occupy in attending some such Machine.

Our Agricultural Society is so badly attended, that many persons want us to import, and keep a stock of seeds, living as we do just close to the Market. Could you supply us with any this spring, and give us some information as to the conducting it and keeping seeds over the summer. If we undertook to keep them, be

should like to advertise, soon
to keep others out of the trade
Mr Thomas I think has given it
up.

Yours very truly
Geo. T. Hazard
