

Hon G W Young

My Dear Sir

Since I wrote
to you on Thursday I have
taken a little time to
consider the different
ways in which the Com.
Committee on Mines could
procure the information
they may require respect-
ing the Coal of Carolina
and have made a
memorandum of the
expense and time re-

ground of three different
methods. This I now
send, and will be ob-
liged to you giving it to the
Committee, if they require any
further information than
that in my letter.

I may state to myself
that I consider the offer
low, as the field year of
a geologist in this country is
only six months and the
wage expenses, if a man
works with any activity
are considerable. All things
considered I could make

July or more at home
but I like the work and
could spare a few months
without regreous regrets in
the interests. Such a man
I would not like to see
sent to be shut by necessity
perhaps.
