copy at the

In the year 1847 we published
a small map of N. S.
& P. E. I. which was carefully
compiled for us, from all the
maps previous publications, with
the addition of new boundaries of
counties from the acts of assembly
and of the hills and mountain
ranges never before introduced into
any map of this Province.

Of this map we found in a
late work published by Mr. Johnson
a facsimile containing many
of the errors that had crept
into us - and into us a few
names & words added - We
also learn that in his paper
of 5 June credit to you of
paid in compiling this map.

We therefore beg leave to ask you
to what extent you hold yourself
responsible for the map and all
and parts be received for you -
if as we have what we may just
reason for believing this map
has merely been traced from ours
it must be sorry that it can be
in no way creditable to the Com-
mand Department to be accused
in publicly sale all over the parts
only a copy of a map compiled
by private individuals for school use
