My dear Sir,

June 28/66

My dear Sir,

I happened to see a few days ago in the possession of Mr Moore a Report by Prof. Seeley on the Coal beds on the East River of Peter, and he mentioned that you or Mr Murray had taken a copy of it, I think it well to say, lest either of you should think of

giving it that the
whole of the facts
stated, including the
two long tables of
the structure and
composition of the
Main coal. seams,
are borrowed from
my "Academiæ Geol."
and Mr Port's papers,
with out slender ac-
knowledgment that any
one reading the report
would be led to believe

that Prof. Serley had
looked out these facts
for himself.

Will you kindly
mention this to
Mr Murray, lest
he should be misled
by this plagiarism.

Sincerely yours
W. Dawson

Dr W. E. Logan }
