

Montreal 23 May 1868

My dear Sir

In the name and on behalf of
the Faculty of Medicine of McGill University,
I have great pleasure in testifying to the
pleasant and friendly character of your relations
with the Faculty, in your capacity as Rector
of the University. Your advice has always
been given in the most delicate and agreeable
manner, and your very able labors in the
Chair of Botany and Zoology, has been
one of the chief means of raising the Faculty
of Medicine, to its present prosperous
condition - While wishing you
on your own account a more important

position, and a more extended sphere of
usefulness, I have only to express the
regret of my colleagues and myself, that
there should be a possible prospect of our
University losing a head, who has done
so much to elevate its educational
character, and extend its usefulness.

I remain my dear Sir

Yours very truly

Wm. Thompson A. M., M. D.

L. R. C. S. Ed. & Dean of Faculty of Medicine

Principal Dawson L. D. F. R. S. &c
