

School of Mines, Columbia College,

CORNER 49TH STREET & 4TH AVENUE,

New York, May 6<sup>th</sup> 1869

Prof J. W. Dawson

My dear Sir

I send you today  
by express, a box containing  
a variety of things which I  
trust will be acceptable to you  
Some ores, Coals, Guano, &c &c  
With a few specimens of Australian  
plants (fossil). Of our own fossil  
plants. Carboniferous & Triassic  
Euglossins & Termites  
I will endeavor to send you  
something of a series, if you  
would like them -

I have increased my collecting  
greatly since I had the pleasure  
of showing you thro' the School  
- have added more than 100 boxes  
full half of fossil plants!

These include Tertiary plants  
from the Upper Missouri, Sitka  
the Yukon river, and Montana  
the latter of great extent from  
a new locality. From new beds  
& especially many new species  
of plants, insects, -

Artacean plants from the  
Upper Missouri - Colorado  
Vancouver Island &c

I should like much to  
show them to you -

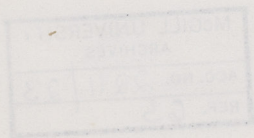

I am hoping for many more  
from Montana & Alaska, and  
shall try to publish something  
about them soon.

I have received the appointment  
of State Geologist for Ohio  
and shall take the field  
about June 1st. under fairly  
good auspices.

If possible I shall be at the  
meeting Amn Assoc. as Salem  
shall be greatly disappointed  
if it do not meet you there

With many remembrances to  
Mr. Rawson. Love as ever

Yours Very Truly  
E. S. Newberry

L.S. Newbery
