

Portland Society of Natural History,

STATE OF MAINE.

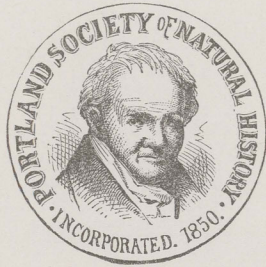

Portland, June 4, 1869.

Prof. J. W. Dawson,
Dear Sir,

My absence from the city has caused till now the delay in this acknowledgment of your kindness. Specimens & pamphlets were very acceptable. I do not send you any of our fossils before hearing again from you, as I wish to inquire whether or not you would like some of the clay from Muijor Hill, Portland. We have opened a vein which is largely foraminiferous, & I don't know as examples of this have ever been submitted to you. Mr Fuller is also laying aside for you some of the shells. Do you wish examples of the common ones? Please indicate if I shall send two or three quarts of the clay & if I shall express it via Canadian Flo.

I should very much like to obtain whatever you may have published on Foraminifera. If you will send to me, I will remit the price. I intend to learn all I can about the Forams & shall be very glad

The Portland Society of Natural History

have received

12 Geological Memoirs by J. W. D.
Species Canada P. Pleiocene fossils.

A G I F T

from Prof. J. W. Dawson L.L.D. — for
which they return a grateful acknowledgement.

C. C. Bolles

Rec. Secretary.

Portland, Me., U. S. A.

June 4. 1869.

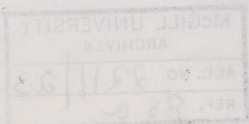

if you will name the best & most
comprehensive treatises on these shells -
we have Williamson & that is all.

I am

Yours Truly

C. L. Bolles
Sec^y.

if you will
compare
the two
of which
one is all.
