

Yarmouth.

23 Sept 1869.

My Dear Sir

As the pupils are now returning I think that I may as well report myself. After coming home in the Spring I did very little except driving about the country assisting Father in his business and taking plenty of fresh air and I very soon found the benefit of it in my health.

During the summer we were not quite decided as to what I had better do this winter but as a vacancy happily occurred in a Bank here I was fortunate enough to obtain a situation.

As I wish to learn office business and am fond of the work I am very glad to get this. —

I enjoyed my winter in Montreal exceedingly and shall always feel grateful for the kindness I received from yourself and M^{rs} Dawson

I think the climate of
Yarmouth agrees with me
better than that of Canada
although it is occasionally
damp and foggy.

As you have no doubt seen
by the papers our gold-
mines are at last opened
and are said to be paying
well. I was at the Diggings
the other day trying to find
some specimens to send you
by Nicksramdler who was
passing through, but neither
there nor at the Crusher
could I find the least

trace of gold. ~~As I have~~

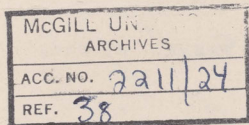

Again thanking you for
your many kindnesses,
and with best regards
to M^{rs} & Miss Dawson and
the family

I remain Dear Sir

Very truly

yours &c

Henry G. Farish

P.S. Father and Mother
wish to be kindly remembered
H. G. F.
