

Museum of Comparative Zoology,

AT HARVARD COLLEGE,

CAMBRIDGE, MASS. Oct. 7. 1869

Dear Sir,

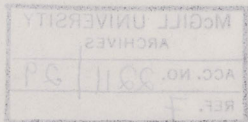

Excuse my long delay in answering your letter; it was unavoidable. I will gladly send you all the specimens you want, deep sea corals & other animals & Brazilian specimens also. The work of arranging the immense amount of materials on hand has thus far prevented me from making any order of them. So you do not come too late, as it may be even some time yet before I can make an cruise, though I have given up looking abroad in order to devote all my time to Museum work this winter.

I should be very glad to receive from you as large a collection of your Devonian & Carboniferous fossils as you can spare me, also the post-pliocene. I like many specimens of each species, when practicable. The more you send, the greater will be my desire to make a suitable return.

Very truly yours

L. Agassiz
