

93. Pleasant Street,
Halifax, 22 Dec. 1869.

My dear Doctor/

I have to thank you
for the preliminary sheets
of your contemplated
Zoological Manual. I shall
be glad to recommend it to
our Students, and to Teachers,
as a convenient and very useful
text book, and hope that
it may be the means of
promoting the scientific
study of Zoology throughout
the Dominion. The want of
a suitable Text Book with Canadian
illustrations has hitherto been

a great drawback, and you
deserve the grateful thanks of
teachers as well as students
of Natural History for supplying
the want in so satisfactory
a manner.

I am occupying my spare
time this winter in the
preparation of a series of
Monographs of our Canadian
Flora, with the view of
showing what has been done,
and suggesting ^{new} points for
investigation. If you would
like to have a paper
of that kind, now and again,
for the Naturalist, I shall
be happy to supply them.

Meantime I send you my
notes on Myosotis & other
Boraginaceae, wh^{ch} is quite
at the service of the
Nat. Hist. Society of Montreal,
if thought of sufficient interest
for publication. I should
be glad if the printer could
let me ~~have~~ ^{have} a dozen
or 24 extra sheets of
my paper, without re-paging.

With kind regards,
I am my dear Sir
yours faithfully,

George Lawson

Principal Dawson, F.R.S.,
Montreal.
