

GEOLOGICAL SURVEY OF CANADA

(Museum and Office, 76, St. Gabriel Street) MONTREAL.

April 4th 1870.

My dear Sir,

I think the curious
fossils from Gaspe will be
found to have one of the following
numbers upon it.

14. San Priest.

41. Dartmouth^(= "N.W.") River.

44. Silver Brook^(= "S.W.") (York River)

✓ 48. Do. 1 mile above^(N.W.) oil well.

51. Belle Aisle.

62. North Beach, Percé.

64. York River. ^(= "N.W.")

67. High Falls, Dartmouth^(= "N.W.") River.

71. Lot 30. 1st. Range - Township of
Gaspé Bay, South.

These are copied from the list previously
sent me with the specimens.

The position indicated as 48 would
be near the base of the Gaspe
Sandstones - on the "San Point
Anticline". From about this position
the Sandstones dip south at angles
varying from 30° down to 0 at
the York River =

St. William's address is

Care of Mrs. Stewart (His sister)

5 Cambridge Square

Hyde Park

London

In case I should not see
you before you leave town,
I wish you a very pleasant
journey and a safe return.

Very truly yours

Robert Bell
